Reference: E148969, Project: 03ME06026

Subject: Completion of CB Test Certificate and Report for DC-DC Converter, Model x2745, x2744, or x2743.

Dear John Graham:

In accordance with your request, we have evaluated the subject product(s) to the requirements of IEC 950, 2nd Edition (1991) with Amendments 1 (1992), 2 (1993), 3 (1995), and 4 (1996); Information Technology and Business Equipment including Electrical Business Equipment per the requirements of IECCE CB Scheme. An additional evaluation was performed in accordance with EN 60950 (1992), Amendments 1, 2, 3 and 4 including National Differences as specified in the CB Test Report.

Enclosed is the completed CB Test Certificate and Test Report. Please review both documents and report any discrepancies to the undersigned by 6/27/2003.

For your information the CB Test Certificate is effective for three (3) years from the Date of Issue noted on the Certificate (IECEE 02, Clause 6.3.4). The NCB may challenge the Certificate when it is more than three years old or when the standard according to which it was issued is no longer in force in the country of the NCB. To maintain the validity of the CB Test Certificate and Report after 3 years, a review and necessary re-testing will be required to ensure continued conformity with the most current edition of the standard.

This completes the work anticipated under Project 03ME06026 and we will be notifying our Accounting Department to bill you for the charges incurred.

Should you have any additional questions or comments, please do not hesitate to contact us.

Very truly yours,

David Keen
